

The Money Masters

(1)

→ How Central Banking Controls the financial cycles.

The 5 bank wars:

- 1)
- 2)
- 3)
- 4)
- 5)

→ The FRB is privately owned (U.S. Courts have ruled this)

Q: Why are we all in debt?

A: We have a debt based banking system

Fact (7) The Federal Reserve has no reserves

state
that
FRB
is private

1923 Charles A. Lindbergh Sr.

1930s Louis McFadden

1960s Goldwater

- Whoever prints the money is in total control
- Real Cause of American Revolution was banking war w/ England (B. Franklin)
- Wars are fought over this. This is what its all about.
- After 1913 and by the end of WWI, the m. Masters had control over the media through ownership.
- Who prints the money has changed hands 8 times since 1764

Solutions: Education, Issue our own money.

Who's wanted to issue our own money?

- Jackson, Lincoln, Jefferson, Franklin, Lincoln
Van Buren.

1913

(2)

Congress gives full control to FR.

Where did they start?

Central Bankers

- ① Jesus rages @ the M. Masters
- ② Romans tried to reform usury laws. Both men trying to change the laws were assassinated
→ Railed @ the men who cornered the market on the shekel. This forced Jews to pay more for the currency. This currency was the only form of payment being accepted @ the market Jesus raged in. Jesus was mad at the usury of the money changers. He was assassinated
- ③ Julius Caesar reformed the money laws & began printing his own money to stop the MM.
He made money plentiful. He was assassinated & the demise of plentiful money came w/ his death.
- ④ Money Supply in Rome was reduced by 90%. Rome fell.
- ⑤ Medieval England = Goldsmiths. First paper money appears & printed by Goldsmiths. G. Smiths became the money masters. G. Smiths realized only a few depositors came in for redemption of their "currency". G. Smiths figured out they could print "more" currency than they had in gold to back it. No one new. They then began to loan out the money & collect interest on it. This was the birth of "Fractional Reserve Banking".
"Lending out many times more money than assets you have on deposit".

Therefore G. Smiths accumulated more & more "wealth",^{currency}
then bought more & more gold.

- FRB is common today (Fractional Reserve Banking)
~~Interest is contrary to logic.~~

G. Smiths learned about "easy" money & "tight" money

Easy money = Lend more currency to masses

Tighter = Don't lend money

* When they'd tightened, a certain portion of the masses couldn't repay their loans or take out new loans. This was KEY. The person would have to sell their assets to the G Smiths for pennies on the dollar. Same thing is going on today; We call it the business cycle.

- 1734 Bank of England moves to squash 726 yr old form of money, the Tally Stick. BOE was/is a central bank. The tally stick was outside their control.

* What ever type of currency a government demands in lieu of tax payments is the currency of choice
British Empire was built on the tally stick system.

⑤ King Henry VIII loosened usury laws enabling money masters to circulate more metal money.

⑥ Queen Mary tightened the usury laws.

⑦ Queen Elizabeth I issued gold & silver coins from the public treasury trying to take away the control of the MM.

1642 - English Revolution - Causes were Religion, Central banking. Cromwell won & he was financed by the MM. King Charles lost & he was not.
Charles was ~~KILLED~~

For the next 50 yrs the MM plunged England into wars. Why? because they profited from it.

⑧ 1688 - Glorious revolution - Central Banking War. Central Bankers won.

50 more years of war ensued.

1694 ⑨ BOE becomes privately held Central Bank.

~~Investors did~~ They loaned English gov lots of money in exchange for England securing the debt through direct taxation of its people.

This is the Model used by all CB^s today.

1698 Inflation skyrocketed & government debt grew. taxes were increased to pay for this.

Boom & Busts follow.

Rothchilds

1743 Bower opens coin shop in Germany. Sticks sign over door that's red w/ ~~shield~~ shield on it. This becomes known as "The Red Shield" firm. In German this means Rothchild.

(son) ^{BOWER} Amshil inherits business after fathers death. He changes his name to Rothchild. Begins lending to governments & Kings.

He had 5 sons. Sends them to 5 capital cities in Europe

1798 to open branches. Frankfurt, Vienna, London, Naples, Paris.

1785 Whole family moves to new house and shares with The ^{MAUSION} Schiffs & Schiffs & Rothchilds are born.

Mid 1800^s Rothchilds are running the world. They financed everyone. J.P. Morgan worked for him.

The American Revolution

Mid 1700^s - British debt reaches 140 mil pounds after financing 4 wars. British gov begins program of trying to raise revenue to make interest payments to BOE. They do this ~~to~~ by taxing the American Colonies. American has no CB. They were poor. Americans constantly had shortages of coinage. They began practicing printing ~~their~~ their own money because of the shortages. Some worked.

1757 - B Franklin goes to London. American Colonies ~~begin~~ begin issuing own money. Colonial Script. It worked. Debt free money. Totally fiat. BOE wasn't happy.

* 1764 Parliament passes currency Act prohibiting colonial script. Demands all future taxes in gold or silver coin.

* Forces colony on gold standard. This kills the economy in America within a year. Depression sets in. Franklin labels this the cause of the American Revolution.

1775 By this time, Colonies drained of silver & gold coin by British taxation.

Colonies print money to cover the war. However we print too much during the war & cause hyper-inflation. Gold back currency isn't the answer.

1781 - Continental Congress, opens privately held bank. "The Bank of North America". Allowed to practice F.R.B. Silver monopoly over printing currency.

1784 - Bank's charter not renewed because value of currency dives after the print to much.

Hamilton was behind money for CB.

1790 Hamilton succeeds in getting new CB.
"First Bank of U.S." Exact same people who ran 1st CB in 1781-1784 ran this one too.

1787 Articles of Confederation:

Madison & Jefferson opposed CB's.
(See Governor Morris' letter to James Madison)
CB's convince delegation (majority) of the writers of the constitution to NOT give Congress the power to print money.
Leaves door open for CB's

→ Hamilton was member of International bankers.

1791 CB bill passed. Given monopoly on printing money.
80% privately held. 20% U.S. gov held because U.S. had to lend CB's the money to open bank. U.S. lends 2 MIL to ^{CB} investors. CB investors use FRB and lends 8 MIL to itself!

- Gov borrows 8 mil over the next 5 yrs, from bank, & prices skyrocket 72% in the country.
- Thomas Jefferson went nuts! He was angry.
- The federal government begins cycle of borrowing economy into oblivion.

↙ See Napoleon downfall. He was against CB's.

1800 French CB created. Jefferson elected president in U.S.
Both don't like CB's. Jefferson begins lending Napoleon

1803 money (GOLD). This was the Louisiana Purchase.
BOE begins financing every nation in Napoleon's path. Prussia, Austria, Russia, all borrowed heavily from BOE to stop Napoleon.

1807 Nathan Rothschild smuggles gold to Spain to finance Spain against Napoleon.

Jackson set out to gut the CB. He fired 2000 gov employees.

1832 Jackson begins run for re-election. CB^s go on the offensive. CB^s ask Congress for renewal of charter 4 yrs before 1836 expiration. Congress passes it. Sends to Jackson

(note) for signature. Jackson VETOED it. (Read Veto ~~some~~ sometime. Supposed to be great message) And.... What happened to Jackson?

- Jackson is first president to take campaign on road.

* * - His campaign slogan was "Jackson & No BANK"!

CB^s put Henry Clay up against Jackson as presidential candidate, and finance him w/ 3mm.

Jackson ~~was~~ won

*** Jackson orders governments money removed from CB and placed in different banks. Sec of Treasury McLaine refuses. Jackson fires him. Appoints William J. Duane. Duane refuses also. Appoints Roger Taney.

1833 Taney completion Oct 1st 1833.

CB^s get Taney's nomination as Sec of Treas rejected

* by Senate. CB^s ~~get~~ man, named Biddle, states that he will cause a depression if banks isn't re-chartered.

→ Nicholas Biddle (This statement is a quote)

→ Threatens to tighten money.

* 1834 ~~is~~ crash is caused ~~by~~ ~~the~~ as Biddle said it would.

Biddle blamed Jackson's withdrawal of Federal Funds from the CB as the cause.

→ Media blasts Jackson.

1834 Congress convenes "Panic Session" & sentences Jackson 1st time ever.

- Jackson lashes out at CB's. "DEN of Vipers"
- April 1834 - Biddle boasts in public about crashing economy. Michigan Senator climbs on board w/ Jackson.
- * Tides turn & Congress rejects Banks Charter.
- Investigating committee put together by Congress to see if CB caused crash.

Biddle won't allow anyone to see banks books. (which has loans on it to politicians). Refuses.

1/6/1835 National debt paid! uh oh. (only pres to pay off national debt)

1/30/1835 ASSASSINATION attempt made on JACKSON.

Assassin brags to friends that powerful Europeans put him up to the attempt.

1837 Second bank's charter not renewed

Biddle arrested & charged w/ fraud. But was acquitted. He died shortly after that.

Jackson retires

It will take the money changers 77 years to get the CB back. Jackson stuck a fork in them.

Jackson was asked what his most important accomplishment was; "I killed the bank."

Lincoln

1861 FRB remained in use by state charter banks.

MM decided to start a war. This would cause debt & dependancy on them. Welcome to the Civil War.

One month after Lincoln was elected, 1st shots fired @ Sumter.

Lincoln had no intention of ending slavery due to the south's economic dependancy on slavery

Lincoln cont., to insist that his job was to save the union, not stop slavery (see his quotes).
What was the Civil War about?

- Northern industry had tariffs enacted on European imports. This forced southerners to buy from the North. Europe retaliated by stopping cotton imports, from the south. ~~They~~ Southerners were in a double bind: The ~~was~~ were losing income from cotton and were forced to buy more expensive goods from the North.

- Money Masters were p.o.d at the loss of their CB in 1836/37. America became well-to-do from 1837-1860.

They wanted a piece of it. They saw an opportunity to divide the nation w/a war.

* Conspiracy theory? Otto Von Bismark, Chancellor of Germany said "Division of US was started long before the Civil War by the high-financial powers of Europe. These Bankers, in Europe were afraid that if the U.S. continued on its prosperous path, it would attain economic and financial independence which would upset their financial dominance over the world."

2 months after St. Sumter, CB^s of Europe lend the son of Napoleon ²¹⁰ million ^{FRANC}s to take troops to the Mexican border ~~front~~. But 1st they had him seize Mexico! They wanted Mexico returned to Colonial rule and this was a violation of the Monroe doctrine of 1823. It would allow the CB^s to take over Mexico, central America & So. America.

Great Britain moved their troops (11K) along the Canadian border too. She sent their fleet on "war alert".

Lincoln needed money to win. The MM^s offered loans to him from 24-36% interest.

Lincoln said no and printed his own money.

"Full Lincoln tender".

1862/63 - Prints 450 million in bills. (Greenbacks)

No interest had to be paid to anyone.

(See Lincoln's quotes on who should print & issue money)

Editorial appeared in the London Times ~~too~~ explaining the CB^s attitude towards "Lincoln's Greenbacks". To say the least, they smashed the idea. (Find this article.)

Find *

The article is extremely telling!

* 1863 "The National Bank Act"

(What is this! find it. This is probably what got Lincoln shot?)

Czar of Russia works w/ Lincoln. Czar gave orders that if England & France ^{or} intervened by giving aid to the south, Russia would consider the action a declaration of war. The Czar was against the CB^s. He'd successfully kept them out of his country & had interest in keeping them out of America.

He sent a fleet to San Francisco.

1864 ~~Had London~~ Nov 21st Lincoln writes a letter to a friend

about the money powers. He bashes them really good. Says " They prey on a nation in times of peace and conspires against it in times of Adversity "

April 14 1865 Lincoln is assassinated
Bismark, the Chancellor of Germany blames the MM.

Allegations surfaced 70 yrs later, in 1934 about the MM's being responsible. Canadian attorney wrote article in Canadian paper about records he was provided. The records were kept from public view. They were given to him by Secret Service agents. The papers were from the trial of J.W. Booth that stated he was a mercenary for the International bankers. In the article on 4/2/1934 it stated that ^{also} the plot to kill him was hatched in Toronto & Montreal.

- Mum → G.G. McGEER (attorney)
- Paper → Vancouver Sun
- Dates → 4/4/1934, 4/2/1934

McGeer went on to say that the MM's wanted the gold standard in place. Lincoln had done the opposite w/ the issuance of greenbacks.

- * Within 8 years of Lincoln's death, the U.S. went on the gold standard, & demonetized silver!
- * Not since Lincoln has the U.S. issued ~~any~~ debt free U.S. notes.

*** UNTIL 1963 when Kennedy RE-issues Lincoln's Greenbacks.

1994 all Greenback are removed from circulation

and replaced w/ Fed reserve notes.

Why is Silver bad for the MM^s? Because Silver was plentiful in the U.S. Gold wasn't.

The Gold Standard returns

4/12/1866 Congress passes "The Contraction act." (Pro Central Bank) Authorizes retirement of a portion of greenbacks. This contracted Money Supply. Money Panics ensued over the next 50 years like clockwork. The MM^s had begun their drive to 1913.

money supply	1866	1.8 bil in circ.	}	2/3 of America's money is retired (called in).
	1867	1.3 bil		
	1876	600 mil		

This was the MM^s at work. Trying to cause panics in America.

1886 400 mil

The money supply was being manipulated by the would-be CB^s of America

How did they contract the supply year after year?

They kept calling in loans and issuing none.

Plus, silver ~~coins~~ were melted.

1872	Garnet is ^{SEVD} sent to America by MM ^s . Paul <u>Quinn</u> 100K to bribe Congressman to get silver demonetized. Told if he wanted another 100K, just ask.
------	---

1873	Congress passes "Coinage Act". Minting of Silver is halted. Representative Samuel Hooper states that MM rep is ^{SEVD} actually "wrote" the legislation.
------	---

Seyo

1874 ~~Ford~~ admits to who was behind the scheme - The ~~Board~~ Governors of the BOE.

1876 1/3 of workforce is unemployed. People wanted Silver or greenbacks back.

Congress does a report on bringing back silver. The report ↓

- Blame International banking for the contraction of money.
- Compares the contraction to the M. supply by the bankers, since the CIVIL War, to the fall of the Roman Empire.
- United States Silver Commission

Despite the report, Congress look no action.

1877 Rioting begins to break-out in the U.S.

America Bankers Association meets to try and decide what to do about the problem. They tell their people to hold tough. Don't give in! Don't let them return to greenbacks. James Buel wrote a letter to the ABA members urging them to flood the papers w/ stories about how bad the greenbacks are. And to withhold patronage from anyone who supports the issue of greenbacks.

"...To Repeal the act creating bank notes, or to restore to circulation the government issue of money will be to provide the people with money and will therefore seriously affect OUR individual profits as bankers & lenders!"

- JAMES Buel
American Banker Association

PRESS

~~Engels~~ tries to turn American people away from the truth

(See) → 1/10/1878 NEW YORK TRIBUNE

1/28/1878 "Sherman Law" passed by congress. Allows small quantity of silver to be mixed. The law was a Sham.

Banks begin loosening up on loans. Depression ends.

1881 James Garfield elected Pres.

- Sherman Money Master publicly after he wins election

7/2/1881 GARFIELD ASSASSINATED

Free Silver

1891 MM's decide to take the economy into depression

Methods & Motives are laid out in a memo by the ABA. Told them to create a depression on a certain date, 3 yrs in the future.

"Sept 1ST 1894, We will not renew our loans & we will demand our money!"

"We will foreclose & become mortgagees in possession.

We will take 2/3 of the farms west of the MISSISSIPPI & thousands east of the Miss., then farmers will become tenants as in England."

- ABA 1891

Printed in congressional record 4/29/1933

America was on the gold standard. The m supply (16) was easily manipulated. Especially because silver was practically outlawed.

MM had a strangle on gold.

1896 Silver becomes central issue in Pres election.
(See William Bryan)

McKinley is gold standard's pro (CB guy).

Industrialists are w/ McKinley. They tell workers the if Bryan is elected, factories will close.

End CD #1
